So about those black boxes Homeland Security installed
in the Power Grid that emit the Lilly Wave invented by
John C. Lilly. Just another SALAR Wave Tool to mind
control you anyways. Bi-directional ultrasonic EMF
will scatter to 440 or so Hz and on the AM 520 Khz
appears as such near a common Linux Computer.
This commmand below made a riffle effect on the power
grid at 520 Khz when I tried it. Block these DHS bastards.
